## FLUORO-SORB

### ADSORPTION MEDIA FOR THE REMEDATION AND REMOVAL OF PFAS

FLUORO-SORB is a proprietary, NSF-certified adsorption media that is proven to effectively treat multiple variants of PFAS. Unlike other sorbent products that are selective and unpredictable in adsorbing PFAS, FLUORO-SORB binds the entire spectrum of PFAS and in a wide variety of removal and remediation processes.

With a specially modified surface, FLUORO-SORB resists competitive adsorption from other water and sediment contaminants making it a more effective and efficient choice.

FLUORO-SORB is commercially available in four variations. For more information or to obtain a sample for your laboratory treatability study, contact [cetco@mineralstech.com](mailto:cetco@mineralstech.com).

#### TREATMENT APPLICATIONS

Groundwater  
Drinking Water  
Surface Water  
Soil

## Adaptable Solutions for Your Specific Project

### Versatility in deployment

- Flow-through filtration technology for drinking and/or groundwater
- Permeable Reactive Barrier (PRB) for passive groundwater
- In-situ stabilization for source zone treatment
- Within a CETCO REACTIVE CORE MAT® composite geotextile mat for sediment capping
- Pre- or post-treatment in connection with other treatment media

### Variability in design

- Three available grain sizes in four custom blends
- 1500lb (680.4kg) supersacks

## High-Performing Treatment Option

### Superior Technology

- Higher sorption kinetics and better sorption capacity
- More selective toward entire family of PFAS
- Not impacted by co-contaminants in the waste stream
- Use with or in place of other treatment media for improved efficacy

### Trusted

- NSF/ANSI 61 certified
- Manufactured in an ISO9001:2015 facility
- Made in the USA

### Our Standards. Your Peace of Mind.

At CETCO, our goal is to help you succeed. Through our knowledge and experience in minerals, polymers, and the construction industry, we provide solutions to unique challenges globally. Our remediation technologies exceed industry standards and offer innovative alternatives to traditional construction options.
